* French I and II may be offered in place of German I and II, and in that case German I and German II will take the place of French I and French II, in the required work of the Sophomore and Junior years. In case both French and German have been offered to satisfy the requirements for entrance, French II (or German II) will replace French I (or German I) as a required subject in the Sophomore year, and the electives in the Junior year will be increased from nine to twelve.
Three hours of the work of the Sophomore year, and nine hours of the work of the Junior year, and all of the work of the Senior year (fifteen hours) are to be taken from the electives.

ELECTIVES IN UNDERGRADUATE WORK.

Students may choose their electives from any courses marked in the catalogue as open to undergraduates with the limitations—first, that no course in a given subject can be taken before a course in the same subject bearing a lower catalogue number without the consent of the professor concerned; and, secondly, that no more than four courses in one subject can be offered for the undergraduate degree.

ELECTIVES IN UNIVERSITY WORK.

Students who have completed all the undergraduate courses required and elective in any subject, may take as a senior elective the first year's graduate work in that subject, provided they secure the approval of the head of the respective school and of the Faculty. A graduate course thus taken as a senior elective and credited toward a Bachelor's Degree cannot be counted again as completed work for a higher degree.

Each elective in graduate work counts three hours a week.

ELECTIVES IN THE OTHER DEPARTMENTS.

The following subjects in the Biblical Department may be taken as electives: Elementary Hebrew (3), Patristic Greek (3). The Septuagint (12), Old and New Testament Literature (3), Early Church History (12), Medieval Church History (12), Modern Church History (12), Christian Ethics (12), Public Speaking (1), Argumentation (1), Christianity and Social Problems (1), Crime and Reformation (1). But the last two subjects must be preceded by the first term of Economics II.

Electives may be taken in the Medical Department to the extent of twelve hours: three hours each for the work done under the Medical Faculty in Materia Medica and Pharmacy, in Anatomy and Osteology, in Histology and Normal Physical Diagnosis, and in Physiology.

One subject, American Law, occupying one term in the junior law course, may be taken in the Law Department.
